DETAILED ACTION

1. This office action is in response to application 10/691,426 and preliminary amendment filed on 3/25/2004. Claims 14-20 remain pending in the application after cancellation of claims 1-13. The application is a division of 10/233,352 filed 8/30/2002, now patent 6,734,521. The application 10/233,352 was restricted; therefore double patenting rejection cannot be applied.

EXAMINER'S STATEMENT AS TO THE REASONS FOR ALLOWANCE

2. Claims 14-20 are allowed over the prior art of record.

3. The following is an examiner's statement of reasons for allowance: the prior art of record does not teach or fairly suggest a system for designing an integrated circuit (IC) comprising a program operable and executed on the processor to generate a plurality of cell models, each of the cell models modeling at least one transistor disposed on a logic path of said IC, the at least one transistor having a gate and a contact, the gate comprising a gate length and a centerline, the distance between the centerline of the gate and the contact modeled by the each of the cell models substantially equal for all of plurality of cell models; identifying at least one of the plurality of cell models using a predetermined criterion (referred to as performance and leakage current, see specification page 6 line 7 to page 7 line 9); and for each identified cell model, model a change of the gate length without modeling a movement of any contact.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

Art Unit: 2825

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
